

**AMENDMENTS TO THE SPECIFICATION:**

Please add the following new paragraph on page 13 after paragraph [0033]

--[0034] A summary of actions performed by the master configurer 202 according to one embodiment of the inventions is now provided with reference to Figure 3. In block 302, the master configurer receives a design of a network. In block 304, it configures network settings for one or more servers in the network into a digital image based upon the design of the network. In block 306, it builds the digital image for at least one of the servers in the network. And in block 308, the master configurer deploys the digital image onto at least one of the servers in the network.--
